Office Action Summary	Application No. 10/617,235	Applicant(s) BERNARD ET AL.	
	Examiner Veronica F. Faison	Art Unit 1755	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claim 5 is objected to because of the following informalities: the claim recites the phrase "especially urea, glycols or a diglycol", the Examiner would like to point out that this limitation is not being considered and that if the Applicant would like for this limitation to be considered that Applicant should delete this phrase for claim 5 and construct a new claim to these limitation (i.e. A marking fluid according to claim 5, wherein the moistening agent is selected from the group consisting of urea, glycols and diglycols.). Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 provides for the method of manufacturing, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Horvat et al (US Patent 5,169,439).

Horvat et al teach a marking fluid comprising an aqueous solution of hydroxypyrene trisulfonic acid (pyranine or C.I. Solvent Green 7) and having a pH value in the alkaline range (abstract and col. 1 lines 66-68). The reference further teaches that a disaccharide such as trehalose may be present in the composition (col. 2 lines 24-45). The composition may comprise one or more other dyestuff preferably fluorescing dyestuff (col. 2 lines 46-49). The pH value that is most preferred is 9 to 10 and buffering agents including sodium citrate (col. 2 lines 50-58). The composition may comprise of additives such as preserving agent including isothiazolinone derivative, surface-active substance or wetting agents and/or water-soluble binding agents (col. 2 line 61-col. 3 line 2). The composition as taught by Horvat et al appears to anticipate the claimed invention.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The references alone or in combination fail to teach a marking fluid comprising the sugar alcohol is a mixture of 1,6-GPS and 1,1-GPM in view of the rest of the claim limitations.

Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Veronica F. Faison whose telephone number is 571-272-1366. The examiner can normally be reached on Monday-Thursday and alternate Fridays 8 am to 5 pm.
